Course Description

This course is designed to provide experienced Orthopaedic Arthroscopy Surgeon with instructional and hands-on experience in the All-Inside ACL reconstruction; from the principles and science behind the technique to the hands-on session with the Mentor Surgeon. The learning objectives of this course are to understand about all-inside ACL reconstruction, the biomechanics of the Modified UKM internal bracing (MUIB™) and graft preparation. The surgeons are expected to gain valuable experience from the Mentor Surgeons during the live surgery and during saw bone session with the faculty. Delegates will hear lectures on All-inside ACL reconstruction and graft preparation before going to the hands-on session.

Faculty will explore these topics in detail through interaction with delegates while course attendees will be actively encourage to engage in the debates and discussions, interact with the faculty and participate fully in the live surgery course.

This course will also benefit the healthcare professionals including assistant medical officers, operating room personnels and physiotherapists.
